

FFR105, Stochastic optimization algorithms

Submission of home problems: Checklist for students

As mentioned in the instructions for the home problems, for each set of home problems, you should e-mail a *single* .zip file or .7z file (only these two formats allowed) containing (i) a single report for the entire problem set in PDF format (*not* one report for each problem), (ii) a separate folder for each problem that involves any programming (e.g. 1.3/ etc.). Separate folders for sub-problems should be used when applicable (mostly for HP2). Send the e-mail with your solutions to mattias.wahde@chalmers.se (not to the course assistants!). The file with your solutions should be named as follows:

LastName_FirstName_HP1.zip

(or .7z) with *LastName_FirstName* replaced by your actual name (for HP2, the files names should be changed in the obvious way, of course). Also, make sure to actually check that you have attached the zip or 7z file before mailing it, to minimize the amount of unnecessary e-mails sent. The submission time is defined as the time stamp (Swedish time) of the *last* e-mail with your solutions (preferably there should be only one such e-mail for HP1 and one for HP2).

Please check the following carefully before submitting your solutions:

- In problems involving programming, have you made sure to follow the coding standard (available on the web page)?
- Have you checked that your programs are self-contained and thus can run, without having to copy files, or parts thereof, between folders, editing files etc.?
- Have you collected all the solutions in folders according to the appropriate file structure (described above), with one folder for each problem (that involves programming), and a subfolder for each subproblem (when applicable)?
- In your .zip file, have you *included* a single report in the allowed format (PDF), for the problem set? Note that the report should be contained in the .zip file – it should *not* be sent separately.
- Have you named the attachment correctly, as LastName_FirstName_HP1.zip (or .7z) (with LastName_FirstName replaced by your name)?
- Is your attachment in the correct format, i.e. zip or 7z?
- Have you made sure to actually attach the file with the solutions?
